Effluent Filters

Biotube® Junior Effluent Filter

Biotube® Junior Effluent Filters are ideal for smaller flows or where septic tank height limitations prevent the use of our full-size filter. Each filter comes complete with Biotube® filter cartridge, PVC housing, and extendable PVC handle.

4" Diameter

18" in Length

Filter Area in Cartridge: 2.44 sq. ft.

Biotube® Effluent Filters

Biotube® effluent filters are used in new or existing tanks, for both residential and commercial applications. Each filter comes with a Biotube® filter cartridge (in 4 and 8 in. diameters), PVC housing, and extendable PVC handle. Optional alarm to signal a tank high-level condition, which may indicate a need to clean the filter.

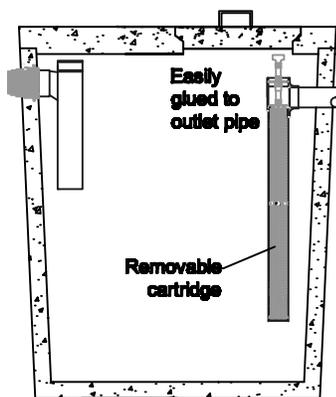

4" Diameter or 8" Diameter

36" in Length

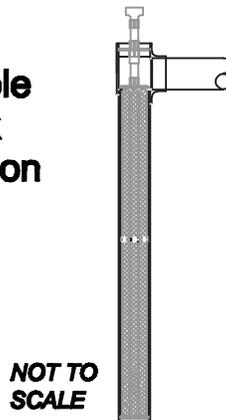

Filter Area in Cartridge:

4 in. = 5.2 sq. ft.

8 in. = 14.9 sq. ft.

**Example
of Tank
Installation**

Effluent Filter:

- Solids greater than 1/8" remain in tank
- Cartridge easily removed and cleaned - simply hose off whenever the tank needs pumping
- Custom sized available for large flow applications (12 and 15 in.)
- Extend drainfield life by preventing solids from leaving the septic tank
- Corrosion-proof construction to ensure long life
- Lifetime warranty

Available in all tank sizes
